CAREER OBJECTIVE

Results-driven Full-Stack Developer, Database Developer, and System Engineer with expertise in building database-driven web applications using PHP, Laravel, and REST APIs, alongside deep Linux internals, high-availability Proxmox VE clusters, Ceph distributed storage, and enterprise hosting infrastructure. Experienced in managing production environments across WHMCS, Virtualizor, cPanel, Plesk, and standalone Linux systems without relying solely on control panel abstractions. Skilled in infrastructure security, automation, virtualization, and scalable hosting operations with a strong focus on uptime, performance, and reliability.

EMPLOYMENT HISTORY

System Engineer | *B.A.R & Associates – Software Company* *January 2025 – Present*

- **Infrastructure & Clustering:** Deploying and managing Proxmox VE multi-node enterprise clusters with Ceph distributed storage pools, ensuring high availability and zero single point of failure.
- **Hosting Automation & Billing:** Configuring and maintaining WHMCS workflows, Virtualizor KVM management, and full-stack environments across cPanel/WHM, Plesk, HestiaCP, and CyberPanel.
- **Linux Internals & Administration:** Performance tuning, kernel-level troubleshooting, and bare-metal management on Red Hat, Ubuntu, and Windows Server 2022 without control panel dependencies.
- **Security Hardening:** Implementing proactive network and server-level firewalls using OPNsense, Fail2Ban, MikroTik, Cloudflare, and custom CSF/iptables rules.
- **DevOps & Automation:** Building automated deployment pipelines via GitHub Actions and containerizing applications using Docker.
- **Database Administration:** Managing backup, recovery drills, and performance tuning for Oracle DB, MSSQL, and PostgreSQL.
- **Full-Stack Development:** Building and maintaining backend applications and REST APIs using PHP, Laravel, and JavaScript for internal and client-facing systems.

Junior Software Engineer | *Beta Solution – Software Company* *February 2024 – December 2024*

- Developed custom Oracle APEX applications and generated enterprise Oracle Forms/Reports.
- Optimized back-end logic using PL/SQL stored procedures, triggers, and functions.
- Managed server configurations and domain routing for secure project deployments.
